PROFESSIONAL SUMMARY

Software Engineer who has owned and shipped systems across payments, real-time video, identity, AI integrations, and IoT hardware. Comfortable working end-to-end across frontend, backend, database, and infrastructure.

EXPERIENCE

Introspect Labs Oct 2025 – Feb 2026
Full Stack Developer *Remote, Bengaluru, India*

- Migrated uyir.ai from OTP-based sign-in to ZITADEL OIDC and synchronized existing user accounts.
- Built therapist booking with slot validation, Razorpay payment capture, and LiveKit room creation.
- Processed signed LiveKit webhooks to track session attendance and prevent duplicate event handling.
- Built text- and voice-based AI journaling with Tiptap inline editing and encrypted storage; blocked journal visualization when crisis content was detected.
- Used presigned AWS S3 uploads for therapist media and knowledge-base files, keeping uploads off the application server.
- Added offline states and global error boundaries to the Next.js application to handle network and rendering failures.
- Automated deployments to a DigitalOcean development environment using GitHub Actions, Docker, and Alembic migrations.

Rafoof 2026 – Present
Freelance Software Engineer *Remote*

- Built a multi-tenant physical library management backend with Fastify, TypeScript, and PostgreSQL 18, enforcing tenant isolation across 18 tables with PostgreSQL RLS and raw pg connection pooling.
- Developed a cross-platform mobile app using Kotlin Multiplatform (KMP) and Compose Multiplatform for Android and iOS with MVI architecture and Zitadel OIDC authentication.
- Integrated CameraX and Google ML Kit for continuous 30 FPS QR scanning, and engineered direct thermal label printing using Android PrintManager and ZXing.
- Implemented weighted full-text and trigram search with PostgreSQL GIN indexes, and prevented duplicate checkouts via Idempotency-Key headers and optimistic row versioning.

Erlang Labs (erlanglabs.com) 2026
Freelance Software Engineer *Remote*

- Built the backend for a call automation SaaS using Go and Python microservices.
- Enforced tenant isolation with ZITADEL authorization and PostgreSQL row-level security.
- Configured APISIX to validate JWTs, rate-limit public routes, strip untrusted headers, and keep internal endpoints private.
- Built an asynchronous document-ingestion pipeline with GCS and JetStream, then indexed Gemini/Vertex AI embeddings in Qdrant for retrieval during calls.
- Built a background provisioner that initializes new organizations across services and retries failed steps independently.
- Built LiveKit agents for inbound and outbound calls using Gemini, ElevenLabs, Cartesia, and Sarvam; captured recordings, transcripts, extracted fields, and usage for each call.

PROJECTS

Sol, Smart Home Ecosystem · Go, Python, PostgreSQL, Redis, MQTT, LiveKit, Azure OpenAI

- Built the Go backend for managing homes, rooms, members, appliances, and device state with PostgreSQL (TimescaleDB) and Redis.
- Built a Python voice assistant with LiveKit and Azure OpenAI for natural-language device control.
- Secured the device platform with ZITADEL authentication, room-level access controls, and mTLS-authenticated MQTT connections.
- Tracked device commands with MQTT acknowledgements and built OTA firmware updates with mTLS-protected downloads and safe retries.

SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, C/C++, Kotlin, Bash, HTML/CSS
Backend: FastAPI, Fastify, Node.js, Express.js, PostgreSQL, TimescaleDB, MongoDB, Prisma, Redis, Celery, Alembic, gRPC
Frontend & Mobile: React, Next.js, Compose Multiplatform, Vue.js, Tailwind CSS, Tiptap, Zustand, Three.js, Framer Motion
Cloud & Infrastructure: AWS, GCP, Azure, DigitalOcean, Docker, Linux, Git, GitHub Actions, Nginx, APISIX, NATS JetStream
AI & Realtime: LiveKit, Gemini/Vertex AI, Azure OpenAI, Qdrant, RAG, MCP
Security: ZITADEL OIDC/OAuth, JWT, mTLS, PostgreSQL RLS

CERTIFICATIONS

- MCP: Build Rich-Context AI Apps with Anthropic – DeepLearning.AI (May 2025)
- Docker Foundations Professional Certificate – Docker, Inc. (Feb 2026)
- Foundation of Cloud IoT Edge ML – NPTEL (May 2024)

EDUCATION

Aalim Muhammed Salegh College of Engineering 2022 – 2026
B.E. in Electronics & Communication Engineering *Chennai, India*
