PROFESSIONAL SUMMARY

Fullstack developer with production experience building and shipping an AI-powered wellness platform end to end - from database design and FastAPI backend to a complete Next.js 15 frontend. Delivered authentication, real-time video sessions, payment processing, and async AI pipelines. Strong fundamentals in system design, security, and cloud deployment.

EXPERIENCE

Introspect Labs

Full Stack Developer

Oct 2025 – Present

Remote – Bengaluru, India

- Architected therapist consultation platform from scratch - professional profiles, session booking with server-side pricing breakdown, LiveKit video sessions, and webhook-driven attendance tracking with 75% threshold missed-session refund logic (1,336 lines across 11 files).
- Built AI journaling pipeline - rant-to-journal articulation via LLM, AES-256-GCM encryption at rest, cursor-style inline editing with custom Tiptap diff marks, crisis detection, and AI visualization via RunwayML/Kling.
- Developed complete Next.js 15 frontend (185 commits) with Zustand state management, Server/Client component architecture for SEO, draggable picture-in-picture video UI, and presigned S3 upload flows.
- Integrated Razorpay for Autopay subscriptions and per-session payments with idempotent webhook handling, HMAC-SHA256 signature verification, and airline-model slot locking to prevent phantom bookings.
- Replaced OTP-based authentication with Zitadel OIDC across the full stack; implemented automatic JWT token refresh with pre-expiry buffer, federated logout, and per-request user sync.
- Set up CI/CD with GitHub Actions (self-hosted runner), Docker, Nginx reverse proxy, Let's Encrypt SSL; authored 30+ Alembic database migrations.

PROJECTS

Zylert – AI Notification Manager (*In Progress*) – Kotlin, Android SDK 36, Room, Node.js, Express.js, OpenAI SDK

- AI-powered notification triaging system that classifies smartphone notifications into priority tiers using GPT-4, generates summaries, and provides a chat interface; expected to reduce notification fatigue by filtering low-priority alerts.
- Three-tier classification (Priority / Moderate / Unwanted) via Azure OpenAI (gpt-4.1-mini) with prompt-engineered rules, batch processing, and Zod-validated I/O; Android client uses Room + Kotlin Coroutines; Express 5 backend with clean service/route separation.

Sol – Smart Home Assistant – Next.js, Prisma, PostgreSQL, Gemini 2.0 Flash, MQTT, MCP

- Natural-language smart home control with real-time device updates via MQTT/WebSockets and secure authentication; PWA with offline-first service worker and WebSocket device sync (1st Prize, T.J.S. Engineering College Project Expo).

Threble – Social Media Platform – Next.js, TypeScript, NextAuth, Prisma, PostgreSQL, Azure Blob Storage

- Open-source social platform for the tech community with scalable media handling and robust social graph (GPL v3).
- LinkedIn-style connection graph with 4-state tracking; community roles (USER/MODERATOR/ADMIN) with RSVP events, join-request approval, 20+ notification types with real-time badge counts, and 20+ Prisma models with compound indexes.

Portfolio – Next.js, Three.js, React Three Fiber, Framer Motion, Firestore, Tailwind CSS

- Interactive 3D portfolio with Three.js scene rendering, smooth page transitions, Firestore-backed contact form secured with reCAPTCHA v3, and SSR-safe dark/light mode via next-themes.

HR Dashboard – Employee Management – Next.js 15, TypeScript, Zustand, Chart.js, Tailwind CSS, Radix UI

- Employee management dashboard with attendance tracking, leave approval, performance reviews, Chart.js analytics, dual navigation (desktop/mobile), themeable UI, and persisted global state; live on Vercel.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Kotlin, HTML/CSS, C/C++

Frontend: React, Next.js, Tailwind CSS, Zustand, Three.js, Tiptap, Framer Motion

Backend: FastAPI, Node.js, Express.js, PostgreSQL, MongoDB, Prisma, Celery, Redis, Alembic

DevOps & Tools: Docker, Git, GitHub Actions, Nginx, Linux, AWS (S3, SES), Azure, LiveKit, Razorpay

CERTIFICATIONS

- Docker Foundations Professional Certificate (Docker)
- Career Essentials in GitHub (GitHub)
- MCP: Build Rich-Context AI Apps (DeepLearning.AI)
- Career Essentials in Software Development (Microsoft)

EDUCATION

Aalim Muhammed Salegh College of Engineering

B.E. in Electronics & Communication Engineering

2022 – 2026

Chennai, India
